Indicators for Education for Sustainable Development (ESD)
International Expert Conference, September 3rd – 4th 2012

Please discuss the following questions

- What experiences (good or bad) did you make with regard to one of the educational levels resp. to educational policy?
- Which precautions should be taken in the application and further development of the proposed ESD indicators in order to avoid the risks and bad experiences and to seize the opportunities going along with the use of indicators?
- At your own valuation: What are genuine benefits of the proposed ESD indicators with specific regard to one of the educational levels resp. to educational policy?
